

**„You will get what you measure ! How do we measure Lean Implementation Progress“  
You do not have a strategic lean measurement and lean control ?! :  
Your competitors have !!**

Initial Situation for You ...	Current situation for your international group ...
<p><u>Scenario 1:</u></p> <p>You have already started a <b>Lean Management Program</b> or there is already an installed <b>Lean Production System</b></p>	<ul style="list-style-type: none"> <li>✦ The sites show a risk to <b>fall back to the old behavior</b></li> <li>✦ The status and the speed of your <b>Lean Transformation is not measurable</b> or transparent</li> <li>✦ Success and <b>Savings</b> of your lean transformation <b>are not coming</b> as phased and planned.</li> </ul>
<p><u>Scenario 2:</u></p> <p>You want to start a <b>Lean Management Program</b> or to install a <b>Lean Production System</b></p>	<ul style="list-style-type: none"> <li>✦ You want to assure, right from the start, that the transformation will succeed</li> <li>✦ The sites demand a precise description, what they are supposed to do in the framework of lean</li> <li>✦ From a strategic perspective, you want to diagnose and measure the lean transformation status continuously</li> </ul>

**„If there is a site-specific success, there must be a method and process in place !  
This method or process is of exciting value for all of the sites in a corporation’s organization !“**

Product : What is LESR ?!	HOW can we measure Lean Success !?
<p>LESR is a <b>strategic</b> Software tool and underlying <b>methodology</b> to assure the successful lean transformation and to accelerate lean implementation progress!</p> <p>It is specifically developed for international groups (groups with e.g. 10 international sites).</p> <p>As a director operations, director supply chain, or strategic director with LESR you are able to:</p> <ol style="list-style-type: none"> <li>1. Direct lean transformation towards success and speed.</li> <li>2. Continuously measure progress of the group and the individual sites / plants</li> <li>3. Lead, define and orient lean strategically</li> <li>4. Multiply lean success from site (plant) to site (plant)</li> <li>5. Develop and guide the local lean management systems towards a strategic best-in-class overall management system</li> <li>6. Identify and disseminate Best Practices group-wide</li> </ol>	 <p>Some sites are falling back in lean transformation efforts !</p>  <p>Where are strengths and opportunities for the individual sites !</p>  <p>At what Lean Level do the sites perform comparing to the best !</p>

Benefit : What's the value for you ?	Your Progress by LESR ?
<p>LESR is a <b>strategic Software tool</b> and underlying methodology <b>to assure and accelerate the successful lean transformation</b> and to accelerate lean implementation progress for an international group (corporation) !</p>	<ul style="list-style-type: none"> <li>✦ Measure and define Lean explicitly</li> <li>✦ Transform quick and successful</li> <li>✦ Detect and multiply Lean success</li> <li>✦ Standardize local lean management systems to a best-in-class</li> </ul>
Software – Modules of an integrated system	Summary
 <p>(LESR 01 : Handbook – 250 pages specified lean implement. know-how)</p>	<ul style="list-style-type: none"> <li>▪ Accurate, unambiguous and obliging specification for the lean transformation, from the headquarter for the sites. <i>„Define the right lean behavior (what-to-do, how-to-do) for the sites!“</i></li> </ul>
 <p>(LESR 02 : Checklists / Measurement and Best Practice Scan)</p>	<ul style="list-style-type: none"> <li>▪ Evaluation of exactly specified lean success criteria from 0 (not available) to 4 (excellent, best practice candidate) <i>„Check and evaluate the criteria for success for a Lean Transformation !“</i></li> </ul>
 <p>(LESR 03 : Site-Assessment / Audit – Develop to Lean Target)</p>	<ul style="list-style-type: none"> <li>▪ Continuous self-assessment and scoring for the plants, including a gap analysis to achieve the committed lean target score. <i>„Measure lean progress and show evidence for right lean behavior. Evaluation of the site's lean management and straight forward actions.“</i></li> </ul>
 <p>(LESR 04 : Corporation-Assessment and Transformations Status Diagnosis for the international group / corporation)</p>	<ul style="list-style-type: none"> <li>▪ Measurement and benchmarking of lean transformation success from a strategic headquarter, multiple-sites perspective. Diagnosis of successful local lean management systems and design of a strategic lean management system. <i>„Multiply sites' success stories by the means of a Best-In-Class Lean Management System“</i></li> </ul>

**The Lean Excellence System Review (LESR) has integrated Best Practices from the best lean production systems. Several international Groups have installed the lean measurement and control system ! Our customers are excited.**
